# IRIS

## THE BROOK GARDENS

H. J. BROOK, Prop.

Goodland,

Indiana

# Foreword

During the past twelve years, we have acquired a large collection of Peonies and Irises, which has increased to such an extent that we are now offering our surplus stock for sale.

Each year we aim to check over our plantings to guard against untrue stock and offer our plants with the guarantee that they are true to name. We will replace any plant that might be sent out mislabeled or refund the price paid.

## Terms

Our terms are cash with order. All plants are sent postpaid, except where otherwise stated.

No order accepted for less than \$1.00.

With an order amounting to \$5.00 you may select plants amounting to .50, which will be sent you free.

With an order amounting to \$10.00, select plants amounting to \$1.00.

With an order amounting to \$25.00, select plants amounting to \$3.00.

With an order amounting to \$50.00, select plants amounting to \$7.50.

Special prices on Quantities of same variety. Carrying charges not prepaid and the above discounts not applying.

25c Varieties, 3 for 50c, 6 for 85c, 12 for \$1.50.

35c Varieties, 3 for 70c, 6 for \$1.20, 12 for \$2.10.

50c Varieties, 3 for \$1.00, 6 for \$1.70, 12 for \$3.00.

## Ratings

The figures placed before the names of the varieties are the Official ratings given by the American Iris Society; 100 being the standard of perfection.

## Culture

Irises will grow to perfection if planted in good, well-drained, garden soil, exposed to full sun and thoroughly cultivated. If the soil needs enriching two tablespoonsful of bonemeal, thoroughly mixed with the soil, is sufficient for each plant. Plant about one inch deep. Irises of a single variety should be placed about twelve inches apart, while a mixed planting should be allowed eighteen to twenty-four inches.

Irises do best in raised beds that insure proper drainage. Crushed limestone mixed with the soil is very beneficial for all bearded iris. An application of lime keeps the soil sweet. The heavier soils are kept in a better condition by the liberal use of lime.

Water sparingly and only during a very dry season. Too much moisture encourages root rot.

Plant any time after blooming season until ground freezes, the earlier the better.

If interested in Peonies ask for our list.

To aid those who may wish some help in the

selection of varieties, we have made up the following collections;

|                  |     |                      |     |
|------------------|-----|----------------------|-----|
| 1. Albert Victor | .25 | 8. Tineae            | .25 |
| 2. Mary Garden   | .35 | 9. Eldorado          | .25 |
| 3. Caprice       | .25 | 10. Florentina       | .25 |
| 4. Lohengrin     | .35 | 11. Mme. Chereau     | .25 |
| 5. Loreley       | .25 | 12. Jacquesiana      | .25 |
| 6. Quaker Lady   | .35 | 13. Rose Unique      | .25 |
| 7. Queen of May  | .25 | 14. L. A. Williamson | .75 |
| <hr/>            |     | <hr/>                |     |
| \$2.05           |     | \$4.30               |     |

We are sending the first seven of the above named varieties postpaid for \$1.00; the fourteen above named varieties sent postpaid for \$2.00.

THE BROOK GARDENS,  
H. J. Brook,  
GOODLAND, INDIANA.
